### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1, second to last line, "displaying, to the user, information" was changed to –displaying, to the user on a screen, information--.

In claim 8, second to last line, "displaying the properties" was changed to –displaying, on a screen, the properties--.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The prior art, Roy et al. (US 5,966,135), discloses a method for disseminating information contained in the real estate database (see column 11, lines 20-26) comprising: receiving from a user a series of points on a map that define a polygonal search area (see column 3, lines 46-50); searching the real estate database for properties within the polygonal search area that meet user map inputs (see column 11, lines 20-26; and displaying, to the user, information about the properties within the polygonal search area that meet the use inputs (see column 11, lines 20-26).

Re claim 1: Roy et al lack the teaching of bounding a drawn area in a box; subdividing the box into latitude/longitude sub-boxes; identifying inside, outside, and

intersecting sub-boxes; subdividing intersecting sub-boxes into further latitude/longitude sub-boxes and identifying the further sub-boxes as one of inside, outside, and intersecting, up to predefined number of iterations, resulting in identified inside sub-boxes and remaining intersecting sub-boxes.

The limitations lacking in the prior art, in combination with the other limitations clearly claimed in the application, are novel and unobvious.

Re claim 8: Roy et al lack the teaching of bounding a drawn area in a box; converting pixels into latitude and longitude coordinates; identifying pixels as one of inside, outside, and intersecting; subdividing the intersecting pixels into sub-pixels and identifying the sub-pixels as one of inside, outside, and intersecting, up to a predefined number of iterations, resulting in one or more of identified inside pixels, identified inside sub-pixels, and remaining intersecting sub-pixels.

The limitations lacking in the prior art, in combination with the other limitations clearly claimed in the application, are novel and unobvious.

The prior art, WO 2004/042494, discloses data management system for facilitating real estate transactions.

Re claim 1, WO 2004/042494 lacks the teaching of bounding a drawn area in a box; subdividing the box into latitude/longitude sub-boxes; identifying inside, outside, and intersecting sub-boxes; subdividing intersecting sub-boxes into further latitude/longitude sub-boxes and identifying the further sub-boxes as one of inside,

outside, and intersecting, up to predefined number of iterations, resulting in identified inside sub-boxes and remaining intersecting sub-boxes.

The limitations lacking in the prior art, in combination with the other limitations clearly claimed in the application, are novel and unobvious.

Re claim 8: WO 2004/042494 lacks the teaching of bounding a drawn area in a box; converting pixels into latitude and longitude coordinates; identifying pixels as one of inside, outside, and intersecting; subdividing the intersecting pixels into sub-pixels and identifying the sub-pixels as one of inside, outside, and intersecting, up to a predefined number of iterations, resulting in one or more of identified inside pixels, identified inside sub-pixels, and remaining intersecting sub-pixels.

The limitations lacking in the prior art, in combination with the other limitations clearly claimed in the application, are novel and unobvious.

The prior art document titled, "Department of Environmental Quality" (<http://environmentalresponse.utah.gov/map/toobar.htm>), teaches a zoom in and zoom out feature for use with maps.

The document titled, "Department of Environmental Quality" lacks the teaching of bounding a drawn area in a box; subdividing the box into latitude/longitude sub-boxes; identifying inside, outside, and intersecting sub-boxes; subdividing intersecting sub-boxes into further latitude/longitude sub-boxes and identifying the further sub-boxes as one of inside, outside, and intersecting, up to predefined number of iterations, resulting in identified inside sub-boxes and remaining intersecting sub-boxes.

The limitations lacking in the prior art, in combination with the other limitations clearly claimed in the application, are novel and unobvious.

Re claim 8: The document titled, "Department of Environmental Quality" lacks the teaching of bounding a drawn area in a box; converting pixels into latitude and longitude coordinates; identifying pixels as one of inside, outside, and intersecting; subdividing the intersecting pixels into sub-pixels and identifying the sub-pixels as one of inside, outside, and intersecting, up to a predefined number of iterations, resulting in one or more of identified inside pixels, identified inside sub-pixels, and remaining intersecting sub-pixels.

The limitations lacking in the prior art, in combination with the other limitations clearly claimed in the application, are novel and unobvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
